NO need for hassling with pipes and wires

Coupler connection to the diagnostic monitoring connector for easy-installation.

Illumination Design

A Red Needle on a White Background offer Ease-of-Reading in our Simple No-frill Design.

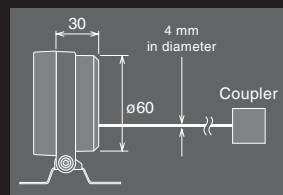

⚠ Please read the following before purchasing.

- ※1 This product connects to the diagnostic monitoring connector and can not be used in conjunction with other products.
- ※2 The display will not work properly and hence is incompatible if either of the following is the case: ① The ECU is different from the standard for that model ② If a sub-computer is being used
- ※3 Some model cars cannot display all items. Please check the list of compatible car models before purchasing this unit.
- ※4 Due to the ECU information received, the displayed values on this product may differ from those of standard or other meters.
- ※5 Air Pressure Correction Function
The air pressure correction function allows you to input altitude values to help make corrections in the differences between the ECU boost pressure info (absolute pressure) and the readings of standard gauges (relative pressure).

Stepping Drive

Stepping Motor Drive brings you a High-Performance Display with No Hunching or Overshooting.

Size

Easy-to-Install with Double-sided Tape. The 4 mm ultra-thin cable. Installability is our Concern.
